**General Information and Notifications**

Last week there was a request to change the November 22<sup>nd</sup> scheduled maintenance window to another date. We have checked for any other date we could use but have not been able to find a suitable one that would work for the majority of districts, so we will go ahead on the 22<sup>nd</sup>.

**Session Termination**

The session termination functionality has been in SD Test for the past week, a few people have tried it out with no reported problems at this point, therefore we will schedule this to be moved into Production this morning.

Daniel Bond reminded everyone that if you are running long processes such as MTB or mass simulation, and terminate the session, that process will need to finish (which may take up to 20 minutes) before you log back in. This is something we will discuss more as spring approaches, but please keep it in mind.

**Implementation and Support**

*Daniel Bond*

**Learning Events / Resource Materials**

We are continuing to work with new district implementations, with trainers on site several times throughout this month. We will also be presenting Pre-Scheduling learning events in the lower mainland in a few weeks, and Student Services Impact Analysis workshops at the end of the month.

On Thursday this week there will be an introductory session on Scheduling Course-based Schools. This session is now closed to registrations, but a recording will be posted for those unable to attend who would like to review the session.

### **November Release**

---

The November release is going ahead as scheduled for November 18<sup>th</sup>. UAT is being performed now. Please refer to the ISW for Release Notes.

### **BCeSIS Important Events**

---

It was decided that the BCeSIS Important Events will be made available from the unsecure side of the ISW. This change will be implemented during the next available maintenance window, probably by the end of November.

## **Governance**

*Andrew Macauley*

### **General Information and Notifications**

---

The SMC executive met last week, with discussions including funding, fees and grants processing, and the BCeSIS Users' Conference. A planning committee is being put together, and there is a tentative date for the conference in early May.

## **SEWG / MRWG**

*Bert van der Geest*

### **General Update and Notifications**

---

This week's meeting of the SEWG is cancelled due to Remembrance Day; the next meeting will be on November 25<sup>th</sup>. The MRWG will meet next week.

## **OSWG**

*Norm Walker*

### **General Update and Notifications**

---

The coding changes Norm discussed last week are described in a document that was posted on the ISW as a News Item on the main page.
