Maximum distinct user logon sessions in a day	15,843
Total distinct user logons for the week	78,124
Maximum number of reports run in a day.....	24,876
Maximum concurrent users in a day	6,167

Operations

Tim Reilly

Updates

- SD Test was refreshed last weekend.
- Over the past few weeks some people who are using the training environment have reported problems printing reports. We will be implementing a fix for this tomorrow before 9:00 a.m.
- We are continuing to investigate session termination. At this time we do not have a workaround that would not cause the same problems that occurred a few weeks ago, but we are still looking into this and will report any findings to Andrew Macauley and the System Delivery Management team.

Maintenance Windows

- Dec. 12 – 13: SD Test operating system upgrade.
- Dec. 15 – 16: Training environment operating system upgrade.

Implementation and Support

Chris Wilson

Implementation

We have started working with SD85 Vancouver Island North. We have also started working with the next group of districts that will be implementing Student Services this year.

Learning Events / Resource Materials

Quite a few people have contacted us about the Pre-Scheduling learning event that was mentioned on last week's call. We will be providing more information about this session soon and are responding to individual requests for more details as they are received.

The companion document for Student Services Goal Progress Reports, called **Teachers and Goal Progress Reports**, was posted last week. A number of districts using the module have started using Goal Progress Reports this year, so we will be regularly updating other related documents with new information as well.

There are many resources in the Learning Resource Centre that refer to Spell Check not working. This is something we will be changing as we go through the year, updating documents related to each business cycle as they come up for review. For example, we have just been updating documents on Report Cards.

Application Management

Dorothy Ward

The last three items from the November Release were implemented. Detailed notes are posted on the ISW.

Communication regarding Children in Care is being finalized, and will be posted as soon as it is ready.

We are gearing up for the BCeSIS upgrade to 12.0; it's a little early yet, but if you would like to participate in UAT please advise Dorothy by emailing her. [We are looking at holding workshops](#) in January to review what will be included in the release.

Governance

Andrew Macauley

General Information and Notifications

There was a full Service Management Council (SMC) conference call last week. If you would like more information about any of the topics discussed at the meeting, please contact your SMC representative.

The next SMC Executive meeting for the year will be held this week. Elections for reps to serve on the Executive are currently underway and will wrap up on Friday. If you have not yet identified someone to represent you on the Executive, please make sure you do so as soon as possible.

Inactive Records in BCeSIS

There was a discussion on the call about this topic. Level 1s are encouraged to contact their SMC representatives about this.

SEWG / MRWG

Bert van der Geest

General Update and Notifications

There was a brief meeting of the MRWG last week. The SEWG will be meeting this week.

The Children in Care documents are being reviewed by a pilot group; we should hear back soon and will send out the information to all districts.

OSWG

Norm Walker

General Update and Notifications

No update this week.
