

Progress Statistics: Week of February 8 – 14, 2010

Schools in production.....	1,926
Number of active students	568,060
Number of inactive students.....	160,453
Maximum distinct user logon sessions in a day	15,358
Total distinct user logons for the week	76,182
Maximum number of reports run in a day.....	22,599
Maximum concurrent users in a day	5,792

Operations

Tim Reilly

Monitoring

The changes that were made within the BCeSIS network infrastructure to isolate us from any Olympics-related traffic impact seem to have been effective. Now that the Olympics are underway, our monitoring shows the system has not been affected by the traffic increase.

Updates

Two updates have been posted on the ISW:

- An SDTest Infrastructure upgrade will be performed on March 27/28. The environment will be unavailable during this time – see [News Item](#) on the main page and the [BCeSIS Important Dates](#) table.
- The latest documents from aal re workstation/software configurations are available on the [Technical Resource Centre > Supported Client Infrastructure](#).page. Both 11.1 and 12.0 are covered.

Application Management

Chris Wilson

12.0 Upgrade

Preparations for the upgrade continue. UAT is currently in progress. Please refer to the ISW for more details.

Attendance Summary

A fix was received from aal for the Attendance Summary that was created in last year's YET run. We are testing it and will try to implement the fix prior to the 12.0 upgrade.

SD28 asked whether the fix also addresses the attendance problem on PSRs. The understanding is that yes, it will fix last year's attendance summary on PSR, but this will be confirmed in testing.

Training and Support

Chris Wilson

Reminder: Two significant learning events related to School Scheduling are coming up in the beginning of March. The first of these, **Tasks Between Pre-Scheduling and Scheduling**, is a short useful progress tracking session that will be delivered twice on **March 2nd**, once in the morning, and then again in the afternoon. This will be followed on **March 4th** by a new session we have developed called **Scheduling Concepts and MTB: Relating Knowledge to Functionality**. Click on the learning event title on the Learning Event Schedule page on the ISW for an outline of this full day learning opportunity which will be very helpful both to school schedulers and the personnel who support the annual Scheduling process in their schools/districts.

A HEAT Self Service Training session is on the Schedule for March 10th. The status of this event is currently "Tentative." If you or other L1 support personnel, whose role includes the submission of incident and service request tickets to the BCeSIS Service Desk, are interested in attending this session, please indicate this by emailing chris.wilson@bc.edu. If there is enough interest we'll open it up to registrations on the ISW as well.

We are about to deliver the first Student Services training workshops to this year's group of implementing school districts/independent schools. If your district is interested in learning more about the implementation process click on the link **Getting Started with Student Services implementation** at the top of the Student Services Resources page: Learning Resource Centre > Focused Areas of Interest > Student Services Resources. At the bottom of the implementation page there is a spreadsheet **Student Services Implemented Districts** which give the most current information on which districts have implemented the module (at least some of its functionality) and which are currently in the process of doing so. This may be of interest to your Student Services administration.

Governance

Andrew Macauley

There will be a meeting by conference call of the full SMC this afternoon. There is a full agenda, including a discussion of inactive student records, sustainability strategies, and the future of BCeSIS.

Implementation Completion

Any districts that have completed implementation, or plan to complete before the end of March, are asked to send in their completion forms as soon as possible, in order that the Ministry can be sure to set aside enough money for accounting purposes.

BCeSIS Users' Conference cancelled

The SMC Executive and the conference planning committee have thoroughly discussed and decided that, given the likelihood of low attendance, there will not be a user's conference this year. Other opportunities and approaches are now being discussed.

SEWG / MRWG

Victoria Williams

General Update and Notifications

The SEWG will meet tomorrow. The agenda will include PSR options.

There was no MRWG meeting last week.

OSWG

Norm Walker

The OSWG will meet on Thursday. They are working on sections H, I and J of the Standards Manual. If anyone has comments or suggestions for these sections please send to Norm Walker asap.

There is a Shared Communications meeting scheduled for Wednesday, the group will discuss standards around Notes, Incidents, Alerts, etc.
